DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 42, 55 – 72, and 77 – 79, drawn to a method of coating an optical device (e.g., a spectacle lens or a mold), classified in class 427, subclass 133 (for the mold coating) and class 427, subclass 164 (for the lens coating).
- II. Claims 43 – 54 and 73 – 76, drawn to an apparatus for applying a coating, classified in class 118, subclass 264.

2. The inventions are distinct, each from the other, because of the following reasons:

Inventions I and II are related as process and apparatus for its practice, respectively.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process, such as (1) a process of treating or coating an article that is not an optical device (e.g., a lens or a mold for a lens), for example coating a metal substrate or impregnating a porous cloth substrate, or (2) a process other than a coating process (i.e., a process of transferring a cleaning or etching solution to a substrate, and then activating such solution with microwave/UV/IR radiation).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Additionally, this application contains claims directed to the following patentably distinct species of the claimed invention represented by Group I (i.e., the process claims). Please note that the examiner's interpretation of which claims fall within each species is provided as well.
 - (1) a process wherein the optical device that is directly coated (e.g., with the transfer pad) is a lens (Claims 16, 38, 55 – 67, and 69 – 72)
 - (2) a process wherein the optical device that is directly coated (e.g., with the transfer pad) is a mold for forming a lens (Claims 17 – 20, 39 – 42, and 68)
5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 1 – 15, 21 – 37, and 77 – 79 are generic in regards to Group I, and Claims 43 – 54 and 73 – 76 are generic in regards to Group II.
6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 1762

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
9. Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
